Protection and Advocacy for People with Disabilities

## The COVID-19 Vaccine & Nebraskans with Disabilities

# GET THE FACTS.

### Why should you get vaccinated?

- You will be much less likely to get COVID-19.
- Even if you do still get COVID-19, the vaccine helps prevent the most dangerous side effects.
- You will be less likely to spread the virus to others.
- You will be able to resume a lot of the activities you did before COVID-19. (You should still wear a mask indoors in public, if you or someone in your household has an underlying condition, or if it is required by laws, rules, regulations, or local guidance).

### You should know...

- Vaccination sites should be 100% accessible. If you run into accessibility issues when you go get your vaccine, contact us.
- Every county in Nebraska has a local public health department that provides these vaccines. If you cannot travel to a vaccination site due to a disability, most local health departments will provide in-home vaccinations upon request.
- All three COVID-19 vaccines (Pfizer-BioNTech, Moderna, and Johnson & Johnson) are free for everyone.\*
- Nobody will ask you to prove who you are, whether you have insurance, what your immigration status is, or ask for any other private information in order to receive the vaccine.\*

\*Applies to vaccinations through local public health departments and may not apply to all private pharmacies.

### Find a COVID-19 vaccine near you.

Visit [vaccines.gov](https://www.vaccines.gov) or
